

## **Honors Approved Electives**

Students will explore an area of study outside their major in which they wish to develop an expertise. This is an opportunity for students to move towards an in-depth study of a chosen specialty area selected with specific academic or professional goals in mind. It also allows for the possibility of developing a minor or second major. Approved Elective courses must be at the 200 or 300-level and selected in consultation with an Honors advisor. The Approved Elective requirements may also be fulfilled by Study Abroad coursework.

The number of Approved Electives available to the student depends on the home college requirements.
